

Assignment –2

Introducing Relational Databases.

1) Which field of the Customers table is the primary key?

The primary key of the Customers table is most likely the **CNUM** field (Customer Number). The CNUM field uniquely identifies each customer, ensuring that no two customers have the same CNUM value.

2) What is the 4th column of the Customers table?

The 4th column of the Customers table is RATING

3) What is another word for row? For column?

Another word for row: Record or Tuple. In databases, a row represents a single, complete set of related data.

Another word for column: Field or Attribute. In databases, a column holds a specific type of data for all records in the table.

4) Why isn't it possible to see the first five rows of a table?

-No data in the table: The table might not have any rows inserted yet.

-The table might be damaged or corrupted, causing difficulty in fetching records.
